

NEXXUS POS

User Manual

Version: May 2026

Currency: JMD (Jamaican Dollar)

Platform: Web / Tablet (dark-themed, mobile-optimised)

Built for Jamaican businesses. Powered by modern cloud technology.

Table of Contents

1. Getting Started

Signing Up

1. Navigate to the app URL and click **Get Started** or go to </signup>.
2. Enter your business name, email, and a password (minimum 8 characters).
3. Complete onboarding — set your business type, upload a logo, and configure your first location.

Logging In

- Go to </login> and enter your email and password.
- After login, you land on the **Dashboard**.

Staff PIN Login (POS)

- The POS page requires a staff PIN to begin a shift.
- On the PIN pad, enter your 4–6 digit PIN.
- Admins and Managers have full access; Cashiers have a restricted view.

Superadmin Login

- Go to </superadmin> for the platform-level admin panel.

Technician Login

- Go to </technician/login> to access the Technician Portal.

2. Point of Sale (POS)

The POS is the primary selling interface, designed for tablet and touchscreen use.

Starting a Shift

1. Open the **POS** from the sidebar.
2. Enter your staff PIN on the PIN pad.
3. If multiple locations are configured, select your location.
4. Enter the opening cash amount in the drawer, then tap **Open Shift**.

Finding Products

- Use the **search bar** to find products by name, barcode, or category.
- Tap any product tile to add it to the cart.
- **Barcode scanner:** Focus the search field and scan — the item is added instantly. If a barcode matches more than one product, a picker dialog opens.

Quick Add Product *(Admin / Manager only)*

- Tap the green **Add** button (with a box-plus icon) beside the search bar.
- Fill in: Name, Price, Category, Barcode (optional), Initial Qty.
- Press **Enter** in the barcode field to advance to Qty; press **Enter** in Qty (or tap the button) to save.
- The product is created in inventory and added to the cart immediately.

Cart Management

Action	How
Increase qty	Tap + on the cart row

Decrease qty	Tap " (removes when qty reaches 0)
Set exact qty	Tap the quantity number and type
Per-item discount	Tap the % or \$ icon on a row
Per-item note	Tap the note icon on a row
Remove item	Tap the trash icon

Product Variants & Modifiers

- If a product has variants (e.g. Small / Medium / Large), a selection dialog opens automatically.
- If it has modifiers (e.g. add-ons, toppings), choose from the list.
- Price adjustments are shown in real time.

Sell by Weight

- Weight items show a unit (kg, lb, oz, g) instead of a quantity stepper.
- Enter the weight from the scale or type it in.

Order Type

Select from the top bar:

- **Counter** — walk-in sale
- **Dine-In** — seated at a table
- **Takeout** — customer collects
- **Delivery** — home delivery

Table Assignment (Dine-In)

- Tap the **table** icon to pick from your configured tables.
- Orders tied to a table are visible in the Tables page.

Attaching a Customer

- Tap the **customer** icon (person+) to search for or create a customer.
- Linked customers earn loyalty points and accrue outstanding balances if needed.

Discounts

- **Order-level discount:** Tap the **Discount** button at the bottom. Enter a percentage or fixed amount.
- **Item-level discount:** Tap the % icon on a specific cart row.
- Manager PIN is required when discounting above your role's threshold.

Order Notes

- Tap the **note** icon in the cart toolbar to add a note to the entire order.

Loyalty Points

- If a customer is attached and has a loyalty balance, a **Redeem Points** option appears.
- Loyalty is earned at a configurable rate (default: 1 point per \$10 spent).

Holding Orders

- Tap **Hold** (save icon) to park the current cart.
- Retrieve held orders from the **Held Orders** panel (clipboard icon).
- Up to 99 orders can be held simultaneously.

Payment

Cash

1. Tap **Cash**.
2. Optionally type the tendered amount on the numpad (e.g. customer hands over \$1,000).
3. Tap **Charge** — the receipt shows **Amount Tendered** and **Change Due**.
 - If no tendered amount is entered, the receipt defaults to exact-amount tendered (change = \$0.00).

Card

1. Tap **Card** and confirm the total.
2. Process on your card terminal; tap **Confirm & Charge** once approved.

Split Payment (Cash + Card)

1. Tap **Split**.
2. Enter how much is paid by card and how much by cash.
3. Charge both portions.

Other Methods

- **Bank Transfer**, **Loyalty**, **Top-Up Credit** — available if enabled by your administrator.

After Payment

- The receipt prints automatically (or a print dialog opens).
- Tap **WhatsApp** to send the receipt directly to the customer's phone.
- Tap **Email** to send it to the customer's email address.
- The order is saved and appears in Order History.

Customer Display (Second Screen)

- If you have a second screen or facing monitor, open [/customer-display](#) on that device.
- The display shows the current cart total in real time via a broadcast channel.

Closing a Shift

- Tap the **lock / end shift** icon in the POS toolbar.
- The system calculates the expected cash; enter your physical count.
- Review variance (over/short), then tap **Close Session**.
- An end-of-day report can be emailed from Cash Management.

3. Orders & Order History

Navigate to **Orders** in the sidebar.

Viewing Orders

- All completed orders appear in a table sorted by date (newest first).
- Each row shows: order number, date/time, items, payment method, total, status.

Filtering & Search

Filter	Options
Date preset	Today, Yesterday, Last 7 Days, Last 30 Days
Custom date	From / To date pickers
Payment method	Cash, Card, Split, etc.
Status	All, Completed, Voided, Refunded
Search	Order number or customer name

Actions (Admin / Manager)

- **Reprint Receipt** — reprints the original receipt in the configured template.
- **Send WhatsApp / Email** — resends the receipt to the customer.
- **Void Order** — requires manager PIN; marks the order void and reverses inventory.
- **Refund** — requires manager PIN; creates a refund record. Enter the amount to refund.

Export

- Tap **Export CSV** to download the filtered order list as a spreadsheet.

Offline Orders

- Orders placed while offline show a **Wi-Fi off** badge.
- They are synced automatically when connectivity is restored.

4. Products & Inventory

Navigate to **Inventory !' Products**

Adding a Product

1. Tap **New Product**.
2. Fill in:
 - **Name** (required)
 - **Category** (required)
 - **Price** (required, inclusive or exclusive of tax depending on your tax mode)
 - **Barcode** (optional; must be unique)
 - **SKU** (optional)
 - **Description**
 - **Initial Stock Qty**
 - **Cost Price** (for profit reporting)
 - **Track Stock** toggle
 - **Active** toggle

Variants

- Open a product !**Variants** tab.
- Add variant groups (e.g. "Size") and options (e.g. "Small", "Medium", "Large").
- Each option can have its own price override or price adjustment.

Modifiers / Customisations

- Open a product !**Modifiers** tab.
- Add choice groups (e.g. "Add-ons") with options and price adjustments.
- Mark a group as **Required** to force selection at checkout.

Composite Products

- Open a product !**Components** tab.
- Link component products and quantities to create a bundle.
- Composite availability is calculated from the lowest-stock component.

Pricing Units (Sell by Weight/Volume)

- Open a product !**Pricing Units** tab.
- Add units (e.g. kg, 100g, lb) with their conversion factor and optional price per unit.

Pricing Tiers (Volume Discounts)

- Set quantity thresholds that trigger automatic price reductions.
- Configured per product via the Pricing Tiers panel.

Stock Management

- **Adjust Stock:** Open a product !**Stock** !' enter a positive (receive) or negative (adjustment) quantity with a reason.
- **Stock History:** Shows every in/out movement with timestamp and reason.
- **Allow Overselling:** Toggle in Settings to permit sales even when stock hits zero.
- **Low Stock Alerts:** Automatically emails you when any product falls below the configured threshold.

Purchase Bills (Receiving Stock)

1. Go to **Inventory !' Purchases**
2. Tap **New Bill**, select vendor, enter products and quantities received.
3. **Confirm Bill** to post the stock increase and create the AP entry.

Vendors

- Manage suppliers under **Inventory !' Vendors**
 - Name, contact, address, and notes per vendor.
-

5. Cash Management

Navigate to **Cash** in the sidebar.

Opening a Session

1. Enter your staff PIN.
2. Select your location (if multi-location).
3. Enter the opening float amount.
4. Tap **Open Shift**.

During a Session

- **Cash Drop (Payout):** Record cash removed from the drawer (e.g. banking run). Enter the amount and reason.
- Running totals for cash, card, and split sales are shown on-screen.

Closing a Session

1. Tap **Close Session**.
2. Enter the physical cash count.
3. Review the variance (balanced / over / short).
4. Confirm to close.
5. Optionally, tap **Email Report** to send the end-of-day summary.

Session History

- All previous sessions are listed with open/close times, opening float, sales totals, payouts, and variance.
 - Expand any session to see its full breakdown.
-

6. Customers

Navigate to **Customers** in the sidebar.

Adding a Customer

- Tap **New Customer** and enter: Name (required), Email, Phone.

Customer Profile

- View total spend, order count, loyalty points balance, and outstanding AR balance.
- Expand to see full order history for that customer.

Loyalty Points

- Earned automatically when orders are linked to a customer.
- Redeemable at the POS checkout.
- Balance is shown on receipts.

Editing / Deleting

- Edit: click the **pencil** icon next to the customer.
 - Delete: click the **trash** icon (requires confirmation).
-

7. Staff & Roles

Navigate to **Staff** in the sidebar.

Adding a Staff Member

1. Tap **New Staff**.
2. Enter: Name, Email (optional), PIN (4–6 digits), Role.
3. Toggle **Active** status.

Roles

NEXXUS POS ships with built-in roles:

Role	Access Level
Admin	Full access to all features
Manager	Full POS + management; can void/refund/discount
Cashier	POS + orders (no voids/refunds without manager PIN)
Inventory Clerk	Inventory management only

Custom Roles can be created in Settings !' Roles. Each permission can be toggled individually.

Location Assignment

- Click the **pin** icon on a staff member to assign them to one or more locations.
- Mark one location as **Primary**.

Manager PIN Override

- Certain actions (void, refund, high-value discounts) require a manager PIN even when logged in as a cashier.

8. Tables (Dine-In)

Navigate to **Tables** in the sidebar.

Adding Tables

1. Tap **New Table**.
2. Enter: Name (e.g. "Table 5"), Capacity (number of seats), Color (for visual identification).
3. Save.

Table Statuses

Status	Colour
Available	Green
Occupied	Blue
Reserved	Amber

Managing Tables

- Edit** a table to change its name, capacity, or colour.
- Free Table** releases an occupied table back to available.
- Delete** removes a table (only when available).

Tables are assigned from the POS during order creation (Dine-In order type).

9. Kitchen Display (KDS)

Navigate to **Kitchen** in the sidebar.

Kitchen Orders

- New orders appear automatically as cards with a 15-minute countdown timer.
- Cards turn red when overdue.
- Tap a card to cycle its status: **Pending** !' **Preparing** !' **Ready**

KDS Screens

- Create multiple named screens to route orders to different prep stations (e.g. "Grill", "Cold Drinks").
- Each screen can be opened on a dedicated monitor/tablet.

Polling

- Kitchen orders update in real time (auto-refresh every 15 seconds).

- Manual refresh button available.

10. Reports

Navigate to **Reports** in the sidebar.

Date Range

Use the preset buttons or enter a custom from/to date:

- Today
- Yesterday
- Last 7 Days
- Last 30 Days
- Custom

Available Reports

Report	Description
Sales Summary	Total revenue, order count, average order value, tax collected
Hourly Sales	Bar chart of sales volume by hour of day
Sales by Category	Revenue breakdown by product category
Top Products	Best-selling items by quantity and revenue
Payment Methods	Split of cash / card / split / other
Staff Performance	Sales totals per cashier
Discounts Report	Total discounts given and by whom
Refunds / Voids	Cancellation summary
Low Stock	Products below the configured threshold
Table Turnover	Average time per table (restaurant mode)

Exporting

- Every report section has an **Export CSV** button.
- CSV files download immediately and open in Excel or Google Sheets.

11. Accounting

Navigate to **Accounting** in the sidebar (Admin/Manager only).

Tabs

Overview

- Period selector (month-to-date, year-to-date, custom).
- Total revenue, expenses, tax collected, net income, order count.

Chart of Accounts

- View all GL accounts (Assets, Liabilities, Equity, Revenue, Expenses).
- System accounts are read-only; custom accounts can be added/edited/deleted.
- Each account has a code, name, type, and subtype.

Journal Entries

- Manually create double-entry journal entries.
- Each entry needs at minimum one debit and one credit line that balance.
- View, filter, and expand existing entries.

P&L (Profit & Loss)

- Period-based income statement.
- Sales revenue, manual income, total expenses, gross profit, net income.
- Breakdowns by payment method.

Balance Sheet

- Point-in-time snapshot of assets, liabilities, and equity.
- Shows whether the books are balanced.

Trial Balance

- Lists all accounts with total debits and total credits.
- Flags imbalances.

Stock Adjustments

- Record manual stock changes with reason codes.
- Optionally linked to a journal entry for COGS tracking.

Stock Counts

- Create a stock count session (name it, e.g. "Month-End Count").
- Record physical counts per product.
- System highlights discrepancies and allows one-click adjustment.

QuickBooks Sync

- Connect your QuickBooks Online account via OAuth.
- Sync sales, expenses, and tax to your QBO company file.
- Monitor sync status and last-sync timestamp.

12. Accounts Receivable (AR)

Navigate to **AR** in the sidebar.

- Lists all outstanding customer balances from credit sales.
- Each record shows: customer, order number, amount, amount paid, status (Open / Partial / Paid), due date.
- Click a record to view payment history and record a new payment.
- Payments can be cash, card, bank transfer, or other.

13. Accounts Payable (AP)

Navigate to **AP** in the sidebar.

Summary Cards

- Total outstanding, overdue, due this week, paid this month.

AP Entries

- Created automatically when a Purchase Bill is confirmed.
- Can also be created manually (e.g. utilities, rent).
- Fields: vendor, amount, due date, reference, notes.

Recording Payments

- Open an AP entry !**Record Payment** !' enter amount, method, date, reference.
- Partial payments are supported; status moves from Open !' Partial !' Paid.

Aging Report

- Shows amounts outstanding broken into: Current, 1–30 days, 31–60 days, 61–90 days, 90+ days.

Supplier Ledger

- Select any vendor to see their full transaction history.

Vendors

- Manage vendor details from the **Vendors** sub-tab.

14. Production & Manufacturing

Navigate to **Production** in the sidebar.

Tabs

Ingredients

- Add raw materials with unit (pcs, g, kg, ml, l), unit cost, and current stock.
- **Adjust Stock** to record receipts or usage.

Recipes

- Link a finished product (SKU) to a list of ingredients with quantities.
- The system calculates material cost per unit.

Batches

- Create a production run: select a recipe, enter the batch quantity.
- **Complete Batch** deducts ingredient stock and increments product stock.
- Batches can be printed for the production floor.

Raw Material Purchases

- Record purchases of ingredients from suppliers.
- Linked to the AP module for payables tracking.

History

- Full log of all batch completions with before/after stock levels.
-

15. Top-Up / Airtime

Navigate to **Top-Up** in the sidebar.

Powered by the **Ding** network — sell international and local mobile airtime/data to customers.

Selling a Top-Up

1. Search for the customer's country.
2. Select the mobile operator.
3. Choose the top-up product (fixed value or range).
4. Enter the recipient's phone number.
5. Tap **Confirm** — the transaction is sent to Ding in real time.

Transaction History

- All top-up sales listed with status (Pending / Success / Failed).
- Filter by date, status, or operator.
- Commission earned per transaction is shown.

Analytics

- Summary cards for total transactions, revenue, and commission for the period.
-

16. Scale & Weight Labels

Navigate to **Scale** in the sidebar (Admin, Manager, Inventory Clerk).

Configuring a Product for Scale

1. Find the product !' toggle **Scale / Weight Item** on.
2. Set the default unit (lb, kg, oz, g) and price-per-unit.

Printing Weight Labels

1. Search for the product.
2. Enter the weight reading.
3. Tap **Print Label** — a barcode label is generated and sent to your label printer.
4. The label encodes the product and weight; scanning it at the POS adds the item with the correct

weight.

Label Management

- View all printed, active, and voided labels.
 - Void a label if it was printed in error.
-

17. Hardware

Navigate to **Hardware** in the sidebar.

Registering a Device

1. Tap **Add Device**.
2. Select the device type:
 - Receipt Printer
 - Barcode Scanner
 - Cash Drawer
 - Card Reader
 - Customer Display
 - Label Printer
 - Tablet / PC
 - Kitchen Display (KDS)
 - Other
3. Enter a friendly name, model, serial number (optional), and connection notes.
4. Save.

Driver Links

- Attach download links for printer drivers, SDK software, or configuration guides.
- Platform tags (Windows, macOS, Android, iOS, Linux) help technicians find the right driver.
- Each link has a label, URL, version, and optional description.

Technician Access

- Hardware page is accessible to Technicians in restricted-access sessions, allowing them to configure devices without accessing sales data.
-

18. Locations

Navigate to **Locations** in the sidebar (Admin only).

Adding a Location

1. Tap **New Location**.
2. Enter: Name, Address, Phone.
3. Toggle **Active**.

Inventory per Location

- Each location maintains its own stock levels.
- Switch between locations using the location tab in the Inventory sub-view.

Stock Transfers

- Select source and destination locations, product, and quantity.
- The transfer is recorded and stock levels updated immediately.

Staff Assignment

- Staff can be assigned to one or more locations via the Staff page.
-

19. Audit Log

Page 10

Navigate to **Audit** in the sidebar (Admin only).

Tracks every significant action in the system:

- Sales, voids, refunds
- Cash open / close / payout
- Product created / updated / deleted
- Staff created / updated / deleted

Filtering

- Search by staff name or reference.
- Filter by action type (dropdown).
- Each log entry shows: timestamp, action, entity, staff name, and a JSON detail payload.

20. Settings

Navigate to **Settings** in the sidebar (Admin only).

Business Profile

Setting	Description
Business Name	Appears on receipts and emails
Business Address	Printed on receipts
Business Phone	Printed on receipts
Logo	Upload a PNG/JPG — shown on receipts and login screen

Tax

Setting	Options
Tax Rate	Percentage (e.g. 15)
Tax Mode	Exclusive (tax added on top) or Inclusive (tax included in price)

Currency

Setting	Description
Base Currency	Primary currency (default: JMD)
Secondary Currency	Optional second currency for display (e.g. USD)
Exchange Rate	Base units per 1 unit of secondary currency

Receipts

Setting	Options
Paper Size	58 mm or 80 mm
Template	Classic, Modern, Minimal, Bold, Supermarket, Convenience, Simple
Footer Text	Custom message printed at the bottom (e.g. "Thank you!")

All templates always print **Amount Tendered** and **Change Due** for cash payments.

Email

Option	Description
--------	-------------

System Email	Use the built-in NEXXUS POS mailer (no configuration needed)
Custom SMTP	Your own SMTP server — host, port, TLS, credentials, from address

- **Daily Digest:** Send a daily sales summary at a chosen hour.
- **Low Stock Alert:** Email when any product falls below the threshold (configurable hour).

Inventory

- **Low Stock Threshold:** Default number of units before a product is flagged.
- **Allow Overselling:** If enabled, sales proceed even when stock reaches zero.

Roles & Permissions

- View all roles (system and custom).
- **Create Custom Role:** Name it and toggle each permission on or off.
- **Edit / Delete** custom roles.
- System roles (Admin, Manager, Cashier, Inventory Clerk) cannot be deleted.

Payment Methods

- Enable or disable specific payment methods shown at the POS checkout.

Online Store / QR Code

- A unique QR code is generated for your store URL.
- Share it with customers or embed it in marketing materials.

21. Subscription & Billing

Navigate to **Subscription** in the sidebar.

Plans

- Choose from available plans on a **Monthly** or **Annual** billing cycle.
- Annual plans offer a discount over monthly billing.

Payment Methods

Method	Notes
PayPal	Instant; redirects through PayPal checkout
Credit/Debit Card	Processed via PowerTranz with 3-D Secure authentication
Bank Transfer	Upload proof of transfer; awaits superadmin review

Subscription Status

- **Trial** — full access for the trial period.
- **Active** — paid and current.
- **Expired** — access restricted; must renew to continue.

Bank Transfer History

- View all submitted transfer proofs and their review status (Pending / Approved / Rejected).

22. Technician Portal

Technicians are third-party installers/support staff who need limited access to a customer's POS to configure hardware and settings without seeing sales data.

Technician Registration

1. Go to </technician/register>.
2. Enter: Name, Email, Phone (optional), Password (min 8 characters).
3. Submit — your account is placed in **Pending** status.

4. A superadmin must approve the account before you can log in.

Technician Login

- Go to </technician/login> and sign in with your email and password.

Technician Portal

- After login, the portal lists all customer locations (tenants) assigned to you.
- Tap **Open POS** to enter a specific customer's system.

Restricted Access

When a technician is inside a customer's system, access is limited to:

- Inventory (Products, Locations, Ingredients, Recipes, Production)
- Hardware
- Reports
- Settings
- Audit

The following areas are **not accessible** to technicians:

- POS / Sales
- Orders
- Cash Management
- Tables / Kitchen
- Top-Up
- Staff
- Accounting / AR / AP
- Subscription / Billing

An **Impersonation Banner** at the top of the screen identifies the active technician session. Click **End Session** to return to the Technician Portal.

23. Super Admin Panel

Navigate to </superadmin> (platform administrators only).

Overview Tab

- Platform-wide stats: total tenants, active/trial subscriptions, MRR, ARR.
- Plan breakdown chart.

Tenants Tab

- List all tenant accounts with subscription status.
- **Impersonate:** Log in as any tenant to troubleshoot.
- **Edit Tenant:** Change plan, status, trial end date.
- **Force Logout:** Invalidate all active sessions for a tenant.
- **Reset Password:** Set a new password for the tenant's admin user.

Users Tab

- List all admin-level users across all tenants.
- Reset user passwords, force logout.

Technicians Tab

Manage the technician workforce:

- View technicians filtered by status (Pending / Approved / Suspended / Rejected).
- **Approve / Reject** pending registrations.
- **Suspend / Re-activate** approved technicians.
- **Reset Password** for any technician.
- **Manage Assignments:** Add or remove tenant assignments — controls which customer systems a technician can access.
- **Delete** a technician account.

Payments Tab

- View all bank transfer proofs submitted by tenants.
- **Approve** or **Reject** each proof with notes.
- Manage bank accounts (add/edit/delete account details shown to tenants for transfer).

Plans Tab

- Create, edit, and delete subscription plans.
- Set name, monthly price, annual price, description, features list, and active status.

Gateway Tab

- Configure the PowerTranz payment gateway credentials used for card billing.

Email Tab

- Configure platform-level email settings.

Marketing Tab

- Manage promotional banners and announcements shown to tenants.

Store Tab

- Configure app store metadata and public-facing settings.

Impersonation Logs

- Full audit trail of all impersonation sessions (superadmin and technician).
- Shows who, which tenant, start/end time, and session duration.
- Active sessions can be force-closed.

24. Receipts

Templates

Template	Best For
Classic	General retail; clean two-column layout
Modern	Branded look with logo emphasis
Minimal	Fast printing; no decoration
Bold	High-contrast; easy to read in bright environments
Supermarket	Wide item columns; customer copy footer
Convenience	Compact convenience-store style
Staple	Hardware/staple goods; card-terminal style layout

Configure the template in **Settings !' Receipts**

Paper Sizes

- **58 mm** — narrow roll, typical in compact printers
- **80 mm** — standard POS roll

Cash Payment Lines

Every cash transaction receipt includes:

- **Amount Tendered** — the amount the customer handed over (defaults to the exact total if not entered)
- **Change Due** — the difference returned to the customer

Other Receipt Sections

- Business name, address, phone, logo
- Order number, date/time, cashier name
- Itemised list with quantities and prices

- Subtotal, tax, discount, total
- Payment method
- Loyalty points earned / redeemed / balance
- Customer name (if attached)
- Receipt footer message

Delivery Options

Channel	How
Print	Opens browser print dialog (connects to POS printer)
WhatsApp	Opens WhatsApp web with a pre-filled text receipt
Email	Sends to the customer's registered email

25. Offline Mode

NEXXUS POS continues working when your internet connection drops.

- Sales made offline are queued locally in the browser.
- A **Wi-Fi Off** badge is shown on the Orders page for queued items.
- When connectivity is restored, the queue is processed automatically in the background.
- Inventory counts and price lookups use the last cached data until sync.

> **Note:** Top-Up / Airtime transactions require an active connection and cannot be queued offline.

26. Permission Reference

Permission Key	Description
pos.sale	Create sales at the POS
pos.discount	Apply discounts
pos.void	Void completed orders
pos.refund	Issue refunds
orders.view	View order history
orders.export	Export orders to CSV
cash.manage	Open/close cash sessions, record payouts
inventory.view	View products and stock levels
inventory.manage	Create/edit/delete products, adjust stock
inventory.purchase	Create and confirm purchase bills
customers.view	View customer list
customers.manage	Create/edit/delete customers
staff.view	View staff list
staff.manage	Create/edit/delete staff, assign roles
reports.view	View all reports
accounting.view	View accounting module
accounting.manage	Create journal entries, manage accounts

settings.manage	Change business settings
tables.manage	Add/edit/delete dining tables
kitchen.view	View kitchen orders
topup.sell	Process top-up / airtime transactions
hardware.manage	Register and configure hardware devices
audit.view	View audit log
