CHAPTER 1

Getting Started

1.1 System Requirements

- **Device:** iPad, Android tablet (10"+), or any desktop/laptop browser
- **Browser:** Chrome 110+, Edge 110+, Safari 16+, Firefox 110+
- **Internet:** Required for cloud sync; offline mode supported for POS sales
- **Receipt Printer:** Any network or USB thermal printer supported by your OS; Bluetooth printing via browser supported
- **Screen:** 1024 × 768 px minimum; 1280 × 800 optimised (landscape preferred for POS)

> **Pro Tip — Install as PWA**
>
> Open NEXXUS POS in Chrome or Edge on your tablet, tap the browser menu and choose Add to Home Screen. The app installs as a full-screen app with offline support and no browser chrome.

1.2 Signing Up — The Onboarding Wizard

Navigate to **/app/signup** to begin the 5-step onboarding wizard:

Step	What you enter
1 — Account	Your name, email, password
2 — Business	Business name, phone, address, tax number, currency (JMD default)
3 — Plan	Choose Starter, Professional, or Enterprise
4 — Payment	Pay via PayPal or credit card (PowerTranz)
5 — Launch	Review summary and launch your dashboard

1.3 Logging In

Go to **/app/login** and enter your email and password. A successful login takes you to the Dashboard. From there you can select a staff profile via PIN to begin a session.

> **Session Tip**
>
> Your tenant session persists in the browser. Staff PIN sessions are stored only for the current browser tab (sessionStorage) — closing the tab logs out the staff member but keeps the tenant logged in.

CHAPTER 2

Dashboard

The Dashboard gives you an at-a-glance view of your business health using live data from today's and recent activity.

2.1 KPI Cards

- **Today's Revenue** — Total of all completed orders today
- **Orders Today** — Count of completed orders
- **Average Order Value** — Revenue ÷ Orders
- **Top Product** — Best-selling item by revenue today

2.2 Charts

- **7-day Revenue Trend** — Area chart showing daily revenue for the past week
- **Sales by Category** — Pie / donut chart breaking down revenue by product category
- **Payment Methods** — Breakdown of Cash / Card / Online / Loyalty payments
- **Top Products** — Bar chart ranking your top 5 products by revenue

2.3 Low-Stock Alerts

Products at or below the stock threshold (default: 10 units) appear in a highlighted panel. Click a product to go directly to its edit form.

2.4 Recent Orders Feed

The last 10 orders are shown with timestamp, order total, payment method, and status badge.

CHAPTER 3

Point of Sale (POS)

3.1 Starting a Sale

1. Navigate to **POS** from the sidebar. Enter the staff PIN when prompted.
2. Browse the product grid or use the **search bar** to find items by name or barcode.
3. Tap a product to add it to the cart. Tap again to increase quantity, or use the +/– buttons on the cart line.
4. If a product has **variants** (e.g. size, colour) or **modifiers** (e.g. add-ons), a dialog opens for the customer to choose. Select options then tap **Add to Cart**.
5. Tap **Charge** when the order is ready.

3.2 Product Search & Barcode Scanning

Type in the search bar to instantly filter products. Hold a USB or Bluetooth barcode scanner to the field and scan — the matching product is added to the cart automatically.

3.3 Category Filters

Tap a category chip above the product grid to show only that category. Tap **All** to clear the filter.

3.4 Discounts

Type	How to Apply	Required Role
Line-item %	Tap the discount icon on a cart line item	Cashier+
Order % discount	Tap **Discount** in the cart header	Manager+ (override PIN)
Fixed amount	Toggle to "Fixed" in the discount dialog	Manager+ (override PIN)
Loyalty redemption	Select a customer → **Redeem Points**	Cashier+

Manager Override

Discounts above the cashier threshold require a manager or admin PIN. The system will prompt for it automatically.

3.5 Selecting a Customer

Tap **Add Customer** in the cart. Search by name or phone number. Selecting a customer enables loyalty point tracking and allows redemption at checkout.

3.6 Loyalty Points

- **Earn rate:** 1 point per $10 JMD spent (automatically awarded on order completion)
- **Redeem rate:** 100 points = $1.00 JMD discount
- To redeem, tap **Redeem Points** after selecting a customer, enter the amount of points to use, and confirm

3.7 Order Types

- Counter — Default; walk-in over-the-counter sales
- Dine-in — Links the order to a restaurant table (see Chapter 5)
- Takeout — Walk-in but for collection; shows on KDS

3.8 Order Notes

Tap the **Notes** icon to attach a free-text note to the order (e.g. "extra sauce"). Notes appear on the kitchen display and the receipt.

3.9 Hold & Recall

Tap **Hold** to save the current cart temporarily. Use **Recall** to restore any held order. Multiple orders can be held simultaneously. Held orders persist until recalled or discarded.

3.10 Payment & Checkout

After tapping **Charge**, select one or more payment methods:

Method	Notes
Cash	Enter amount tendered; change is calculated automatically
Card	Process on your card terminal; record the amount in NEXXUS
Online / Transfer	Record bank transfer or online payment reference
Loyalty	Deducted from customer points balance
Split	Combine any two methods (e.g. part cash / part card)

3.11 Receipts

After completing a payment, the receipt modal appears. Options:

- **Print** — Sends to the default thermal printer via the browser print dialog
- **WhatsApp** — Opens a pre-filled WhatsApp message with receipt text to share with the customer
- **Email** — Sends the receipt via ZeptoMail to the customer's email on file
- **Close** — Dismiss and start the next sale

CHAPTER 4

Orders

The Orders screen shows the full history of all transactions for your business.

4.1 Filtering Orders

Use the status tabs — Completed, Pending, Voided — to filter the list. Use the date picker to select a custom range.

4.2 Viewing an Order

Click any order row to expand its details: line items with quantities and prices, payment method, staff member, customer (if any), discount applied, and notes.

4.3 Void & Refund

- **Void:** Cancels an order and reverses stock deductions. Requires Manager or Admin role.
- **Refund:** Records a cash or card refund against a completed order. Logged as a separate transaction.

> **Void is Permanent**
>
> Voided orders cannot be restored. Always confirm before voiding.

CHAPTER 5

Tables (Restaurant Mode)

The Tables module provides a visual floor plan for restaurants and cafés with table-based ordering.

5.1 Setting Up Tables

1. Go to **Tables** in the sidebar.
2. Tap **Add Table**. Enter a name (e.g. "Table 1"), capacity, and choose a colour.
3. Drag tables to arrange them on the floor plan. Tap a table shape to edit or delete it.

5.2 Table Statuses

- Available — No active order
- Occupied — Has a live in-progress order linked to it
- Reserved — Manually marked as reserved

5.3 Opening a Dine-in Order

Tap an available table → tap **Open Order**. This takes you to the POS with the order type set to Dine-in and the table linked. Multiple orders can run on the same table (e.g. if you split the bill).

CHAPTER 6

Kitchen Display (KDS)

The Kitchen Display System gives your kitchen staff real-time visibility of incoming orders without paper tickets.

6.1 The Kanban Board

Orders are shown in three columns:

- Pending — Just placed, not yet acknowledged
- Preparing — Kitchen is working on it
- Ready — Done, waiting for pick-up or table service

6.2 Advancing an Order

Tap the → **Next Status** button on an order card to move it to the next column. Orders in Ready are automatically removed from the board when marked as completed at the POS.

The KDS auto-refreshes every 15 seconds. A chime sounds when a new order appears.

CHAPTER 7

Products & Inventory

7.1 Adding a Product

1. Go to **Products** → tap **Add Product**.
2. Enter the product name, category, price (JMD), and optionally a barcode, cost price, and stock count.
3. Toggle **Has Variants** (e.g. Small / Medium / Large) or **Has Modifiers** (e.g. Extra Cheese + $150) if needed.
4. Add your variant groups and options, each with an optional price adjustment.
5. Tap **Save**.

7.2 Variants vs Modifiers

	Variants	Modifiers
Purpose	Different versions of the same product	Optional add-ons or customisations
Selection	Customer must pick exactly one per group	Customer can pick zero or more
Example	Size: Small / Medium / Large	Add-ons: Extra cheese, No onion

7.3 Managing Stock

- **Stock Count:** Set on the product form. Auto-decrements on every sale.
- **Low-stock threshold:** Default 10 units; shown as an alert on the Dashboard.
- **Mark Out of Stock:** Toggle the In Stock switch to hide the product from the POS grid without deleting it.
- **Stock Purchases:** Record a stock purchase (Accounting → Inventory → Purchases) to increment the count.

7.4 Stock Adjustments

Go to **Accounting → Inventory → Stock Adjustments** to manually adjust a product's stock count up or down with a reason code. An optional journal entry is created automatically.

7.5 Stock Counts (Physical Count)

1. Go to **Accounting → Inventory → Stock Count** and tap **New Count**. The system snapshots all current stock levels.
2. Physically count each product and enter the physical quantity in the count sheet.
3. Review discrepancies (system vs physical) highlighted in red.
4. Tap **Apply Count** to update stock levels to match your physical count. A journal entry records the variance.

CHAPTER 8

Customers & Loyalty

8.1 Customer Profiles

Go to **Customers** to manage your customer database. Each profile stores:

- Name, email, phone number
- Total spent, number of orders
- Loyalty points balance
- Full order history

8.2 Adding a Customer

Tap **Add Customer**, enter name, email, and/or phone. The customer is now selectable at the POS.

8.3 Loyalty Programme

Action	Details
Earn points	1 point per $10 JMD spent; awarded automatically on order completion
Redeem points	100 points = $1.00 JMD off the order total
View balance	Shown on the customer profile and at POS checkout
Manual adjustment	Admins can edit the points balance on the customer profile page

CHAPTER 9

Staff Management

9.1 Staff Roles

Role	Access Level
Admin	Full access — settings, staff, accounting, reports, voids, discounts
Manager	All POS functions, discount overrides, staff view, reports, void orders
Cashier	POS, orders (view own), customers, basic reports
Kitchen	Kitchen Display only

9.2 Adding a Staff Member

1. Go to **Staff** → tap **Add Staff**.
2. Enter the staff member's name and role.
3. Set a 4–6 digit PIN. This PIN is used to authenticate at the POS.
4. Assign the staff member to one or more branches (Locations).
5. Tap **Save**.

9.3 PIN Authentication

When launching the POS, staff select their name from a list and enter their PIN. The session is stored for that browser tab only. If a manager-level action is required (e.g. a discount override), a second PIN prompt appears.

9.4 Deactivating Staff

Tap a staff member → toggle **Active** to deactivate them. Deactivated staff cannot log in but their historical data is preserved.

CHAPTER 10

Locations / Branches

NEXXUS POS supports multiple business locations under one account. Each location has its own inventory and can be staffed independently.

10.1 Creating a Location

Go to **Locations** → tap **Add Location**. Enter the branch name, address, and phone. Tap **Save**.

10.2 Per-branch Inventory

Each branch maintains its own stock levels. After creating a location, tap **Initialise Inventory** to seed it with all your products at zero stock. Then record purchases or transfers to build up stock.

10.3 Stock Transfers

1. Go to **Locations** → select the source branch → tap **Transfer Stock**.
2. Choose the destination branch, product, and quantity.
3. Confirm — stock is deducted from the source and added to the destination instantly.

All transfers are logged in the Transfer History with timestamp, user, and quantity.

CHAPTER 11

Cash Management

Track your cash drawer from opening to closing with full shift reconciliation.

11.1 Opening a Shift

1. Go to **Cash Management**.
2. Tap **Open Shift** and enter the opening cash amount (float in the drawer).
3. Confirm. The shift timer starts.

11.2 Mid-shift Payouts

To record cash removed from the drawer during the shift (e.g. petty cash, banking), tap **Record Payout**. Enter the amount and reason. This is deducted from the expected closing balance.

11.3 Closing a Shift

1. Tap **Close Shift**.
2. Count the cash in the drawer and enter the **Closing Cash** amount.
3. Review the reconciliation: Opening + Cash Sales – Payouts = Expected. Any variance (over/short) is highlighted.
4. Tap **Confirm & Close**.

11.4 End-of-Day Reports

After closing a shift, tap **EOD Report** to view or print the shift summary. Two print options:

- **Print Summary** — Totals only (cash, card, online, loyalty)
- **Print with Sales Detail** — Summary plus all individual orders

CHAPTER 12

Reports

12.1 Summary Report

Select a date range (or use a preset: Today / This Week / This Month / Last Month / Custom). The report shows:

- Total Revenue, Total Orders, Average Order Value
- Top Product of the period
- Revenue by payment method

12.2 Hourly Sales Chart

Pick a specific date to see revenue broken down by hour of the day. Useful for identifying peak trading hours.

12.3 CSV Export

Tap **Export CSV** to download all orders for the selected date range as a spreadsheet-compatible file. Each row includes order ID, date/time, items, total, payment method, staff, and customer.

CHAPTER 13

Accounting Module

NEXXUS POS includes a full double-entry accounting system tailored for small businesses.

13.1 Overview Tab

Shows KPI cards for Revenue, Expenses, Net Income, and Tax Collected for the selected period (Week / Month / Year).

13.2 Chart of Accounts

22 default accounts are seeded automatically covering Assets, Liabilities, Equity, Revenue, and Expenses. You can:

- Create new accounts with a code, name, and type
- Edit existing accounts
- Deactivate accounts that are no longer needed
- Filter by account type using the tabs

13.3 Journal Entries

Record manual double-entry transactions (e.g. depreciation, accruals).

1. Tap **New Entry**. Enter a date and description.
2. Add debit and credit lines using your chart of accounts. Total debits must equal total credits.
3. Tap **Post** to save.

> **Auto-entries**
> NEXXUS POS automatically creates journal entries for every sale, stock adjustment, and stock count discrepancy. You rarely need to enter these manually.

13.4 Financial Reports

Report	What it shows
Profit & Loss	Revenue minus expenses for a date range
Balance Sheet	Assets, liabilities, and equity as at a specific date

Trial Balance	All account balances (debits and credits) as at a date

All reports support custom date ranges and can be printed from the browser.

13.5 QuickBooks Integration

1. Go to **Accounting → QuickBooks** tab.
2. Tap **Connect to QuickBooks**. You will be redirected to QuickBooks for OAuth authorisation.
3. Once connected, tap **Sync Orders** to push recent POS sales to QuickBooks as Sales Receipts.
4. To disconnect, tap **Disconnect**.

> **Requires QuickBooks Online**
>
> The integration works with QuickBooks Online only (not Desktop). Admin credentials for `QUICKBOOKS_CLIENT_ID` and `QUICKBOOKS_CLIENT_SECRET` must be configured by your system administrator.

CHAPTER 14

Customer Menu & Online Ordering

Share a branded digital menu with your customers for online browsing or kiosk self-ordering.

14.1 Accessing Your Menu URL

Go to **Settings → QR Codes**. Your unique menu URL is displayed in three modes:

- **View Menu** — Browse only, no ordering
- **Online Order** — Full ordering for delivery or collection
- **Kiosk Mode** — Self-service ordering for an in-store tablet

Each mode has a downloadable QR code (SVG format, print-ready).

14.2 Customer Experience

1. Customer scans QR or opens the link
2. Browses menu by category, searches products
3. Adds items to cart, customises variants and modifiers
4. Proceeds to checkout, enters name and contact details
5. Order is received instantly in your POS Orders screen and on the Kitchen Display

14.3 Kiosk Mode

Mount a tablet at your counter, open the kiosk URL in full-screen mode. Customers self-order; the order goes directly to the kitchen. Payment is collected at the counter.

CHAPTER 15

Customer Display

Show customers a live view of their order total on a second screen facing them.

15.1 Setup

1. Connect a second monitor or TV to your POS terminal, or use a second device (tablet/monitor).
2. Open the URL **/customer-display** in a browser on the second screen.
3. Set the browser to full-screen (F11).

The display automatically listens for POS activity on the same network. When a sale is in progress, the customer sees a live itemised list and running total.

15.2 What Customers See

- Business logo and name
- Itemised cart with product names, quantities, and prices
- Subtotal, discounts, tax, and grand total
- Payment confirmation screen after checkout
- Idle branded screen between transactions

CHAPTER 16

Accounts Receivable (AR)

Track credit sales and outstanding customer balances.

16.1 Creating a Credit Sale

At the POS checkout, select **Credit / On Account** as the payment method (requires a customer to be attached to the order). The order completes and the balance is logged as a receivable.

16.2 AR Dashboard

Go to **AR** in the sidebar to see:

- Total outstanding balance across all customers
- List of open invoices with customer, amount, due date, and aging
- Overdue invoices highlighted in red

16.3 Recording a Payment

Tap an invoice → tap **Record Payment**. Enter the amount received and payment method. Partial payments are supported; the remaining balance is tracked.

CHAPTER 17

Ingredients & Production

Manage raw ingredient stock and track production of finished goods from recipes.

17.1 Ingredients

Go to **Ingredients** to manage your ingredient list. Each ingredient has a name, unit of measure (kg, litre, each, etc.), current stock level, and reorder threshold.

17.2 Recipes

Go to **Recipes** to link a product to a list of ingredients and quantities. When a production run is recorded, ingredient stock is automatically deducted.

17.3 Production Runs

1. Go to **Production** → tap **New Production Run**.
2. Select the recipe (product) and the quantity produced.
3. Confirm — ingredient stock is deducted according to the recipe, and the product's stock count is increased by the produced quantity.

CHAPTER 18

Settings

18.1 Business Information

Go to **Settings → Business Info** to update:

- Business name, address, phone, email, website
- Tax number / TRN
- Currency (defaults to JMD)
- Tax rate (default: 10%)
- Logo upload

18.2 Receipt Settings

- Custom receipt header and footer messages
- Toggle to show/hide tax breakdown on receipt
- Toggle to show loyalty points balance on receipt
- Choose thermal receipt format (58mm or 80mm)

18.3 Email Provider

NEXXUS POS uses **ZeptoMail** to send email receipts. The system is pre-configured with the domain `microbookspos.com`. No additional setup is required for the default sender.

18.4 QR Codes

The Settings → QR Codes section generates print-ready SVG QR codes for:

- Menu / Browse only
- Online order link
- Kiosk mode link
- Customer Display URL (for a second screen)

CHAPTER 19

Subscription & Plans

19.1 Plan Comparison

Feature	Starter $29/mo	Professional $79/mo	Enterprise $199/mo
Staff accounts	5	15	Unlimited
Products	100	500	Unlimited
Locations	1	3	Unlimited
Online ordering	✓	✓	✓
Accounting module	—	✓	✓
QuickBooks sync	—	✓	✓
Annual discount	Save $58/yr	Save $158/yr	Save $398/yr

19.2 Upgrading or Changing Plans

Go to **Subscription** in the sidebar. Select your new plan and complete payment via PayPal or credit card. The new plan activates immediately.

19.3 Payment Methods Accepted

- **PayPal** — PayPal account or any card via PayPal guest checkout
- **Credit / Debit Card** — Via PowerTranz (Visa, Mastercard, AMEX accepted)

CHAPTER 20

Reseller Portal

The NEXXUS POS Reseller Programme lets partners earn recurring commissions by referring businesses to the platform.

20.1 Joining as a Reseller

Go to **/reseller/signup** and complete the registration form. Once approved, you receive a unique referral code (e.g. `ACME-X4K7PQ`).

20.2 Sharing Your Referral Code

Direct prospects to **/app/signup?ref=YOUR_CODE**. When they subscribe, the referral is automatically attributed to you.

20.3 Commissions

- **Default rate:** 30% of every monthly subscription payment made by your referred businesses
- Commissions are generated automatically when a referred business pays
- View all commissions in the **Commissions** tab of the portal

20.4 Requesting a Payout

Once you have accumulated pending commissions, go to the **Payouts** tab and tap **Request Payout**. This bundles all pending commissions into a single payout request. Payments are processed within 5 business days.

20.5 Dashboard Overview

- Total referrals and active referrals
- Lifetime earnings
- This month's earnings
- Pending payout balance
- Monthly earnings chart
