

NEXXUS POS

Clothing Boutique Manual

Version: May 2026

Currency: JMD (Jamaican Dollar)

Business Type: Retail — Clothing Boutique

Variants: Size & Colour

Loyalty Programme

Barcode Scanning

Multi-Branch

Reports & Analytics

Built for Jamaican businesses. Powered by modern cloud technology.

Version: May 2026 | **Currency:** JMD | **Business Type:** Retail

1. Getting Started

Creating Your Account

1. Go to the app URL and click Get Started or navigate to /signup.
2. Enter your store name, email address, and a password (minimum 8 characters).
3. During onboarding, select Retail as your business type.
4. Your account begins on a free trial. See Section 12 to activate a paid plan.

Logging In

- Go to /login, enter your email and password, and you will land on the Dashboard.
- The Dashboard shows today's sales, top products, and payment method summary at a glance.

Staff PIN Login

- The POS requires every staff member to enter their 4–6 digit PIN before selling.
- Admins and Managers see all controls. Cashiers have a simpler, sale-focused view.

2. Setting Up Your Product Catalogue

Navigate to **Inventory** in the sidebar.

Adding a Clothing Item

1. Tap New Product.
2. Fill in the following fields:

Field	Notes
Name	e.g. "Floral Wrap Dress"
Category	e.g. Dresses, Tops, Bottoms, Accessories
Price	Selling price (JMD)
Cost Price	What you paid — used in profit reports
Barcode	Scan or type the garment barcode
SKU	Your internal reference code (optional)
Initial Stock Qty	Starting units on hand
Track Stock	Toggle ON to monitor stock levels

3. Tap Save.

Sizes & Colours — Variants

Variants are the most important feature for a clothing boutique. They let one product (e.g. "Slim Fit Chinos") have multiple size/colour combinations, each with its own stock count.

To add variants:

1. Open the product !' Variants tab.
2. Create a variant group named Size and add options: XS, S, M, L, XL, XXL.
3. Add another group named Colour and add options: Black, White, Navy, Olive.
4. Each combination can have its own price override if needed.
5. Each variant tracks its own stock count independently.

Tip: A single size-colour combination (e.g. Size M / Colour Black) is one variant. Set opening stock for each one when you first add the product.

Add-Ons / Customisations (Modifiers)

Use modifiers for optional extras at checkout — for example:

- Gift wrapping (+\$150)
- Personalised embroidery (+\$500)
- Hemming service (+\$300)

Open a product **!Modifiers** tab **!** add a group with options and prices.

Barcodes

- Every garment should have a barcode (either the manufacturer's or your own printed label).
- Scan directly into the Barcode field when creating the product.
- At the POS, scanning a barcode instantly finds and adds the item to the cart.

Organising by Category

Good categories speed up the POS and make reports more useful. Suggested categories for a boutique:

- Dresses
- Tops & Blouses
- Pants & Jeans
- Skirts
- Outerwear & Jackets
- Swimwear
- Accessories
- Footwear
- Lingerie & Sleepwear
- Sale / Clearance

3. Point of Sale (POS)

Navigate to **POS** in the sidebar.

Starting Your Shift

1. Open the POS page.
2. Enter your staff PIN.
3. Select your location if you have more than one branch.
4. Enter the opening cash float in the drawer.
5. Tap Open Shift — you are now ready to sell.

Finding and Adding Items

By barcode scanner:

- Focus the search bar and scan the garment tag. The item (and its variant) is added to the cart instantly.
- If the barcode matches more than one product, a picker appears — select the correct one.

By search:

- Type the product name or category in the search bar.
- Tap the product tile to add it to the cart.
- If the item has variants, a dialog opens — select the size and colour, then confirm.

Quick Add (Admin / Manager only):

- Tap the green Add button beside the search bar to create a brand-new product on the spot.
- Fill in the name, price, category, and optional barcode, then save. The item goes into inventory and the cart simultaneously.

Managing the Cart

Action	How
Increase quantity	Tap + on the cart row
Decrease quantity	Tap "
Remove item	Tap the trash icon
Per-item discount	Tap the % or \$ icon on the row
Add a note to an item	Tap the note icon (e.g. "customer requested alterations")

Applying Discounts

- Order discount: Tap Discount at the bottom. Enter a percentage (e.g. 10%) or a fixed JMD amount.
- Item discount: Tap the % icon on a specific cart row.
- A manager PIN is required for discounts above the configured threshold.

Loyalty Points

- Attach a customer to the sale (see below) and they automatically earn loyalty points.
- If the customer has enough points, a Redeem Points option appears at checkout.
- Loyalty balance prints on the receipt.

Attaching a Customer

- Tap the customer icon (person+) in the toolbar.
- Search by name or phone number.
- Tap New Customer to create one on the spot (name, email, phone).
- Linked customers build a purchase history and earn loyalty points.

Order Type

For a boutique you will mostly use **Counter**. If you offer delivery, select **Delivery**.

Holding a Sale

- Tap Hold to park the current cart (e.g. customer wants to keep looking).
- Tap the clipboard icon to recall held orders. Up to 99 sales can be held at once.

Payment

Cash

1. Tap Cash.
2. Type the amount the customer hands over on the numpad (e.g. \$5,000).
3. Tap Confirm — the receipt shows the amount tendered and change due.

Card

1. Tap Card.
2. Process the payment on your card terminal.
3. Tap Confirm & Charge — the sale is complete.

Split (Card + Cash)

1. Tap Split.
2. Enter how much goes on card and how much is cash.
3. Confirm both portions.

After the Sale

- The receipt prints automatically.

- Tap WhatsApp to send the receipt to the customer's phone.
- Tap Email to send it to their email address.
- Stock is deducted automatically for each variant sold.

Closing Your Shift

1. Tap the lock icon in the POS toolbar.
2. Enter the physical cash count from the drawer.
3. Review the variance (balanced / over / short).
4. Tap Close Session — an end-of-day report can be emailed.

4. Orders & Order History

Navigate to **Orders** in the sidebar.

Viewing Sales

All completed sales appear in a table showing: order number, date/time, items, payment method, total, and status.

Filtering

Filter	Options
Date preset	Today, Yesterday, Last 7 Days, Last 30 Days
Custom dates	From / To date pickers
Payment method	Cash, Card, Split
Status	Completed, Voided, Refunded
Search	Order number or customer name

Reprinting a Receipt

- Expand an order row and tap Reprint — the receipt opens in the configured template.

Voiding a Sale *(Manager PIN required)*

- Expand the order !' tap Void.
- Enter a manager PIN.
- The order is cancelled and stock is returned automatically.

Processing a Refund *(Manager PIN required)*

- Expand the order !' tap Refund.
- Enter the refund amount and a reason.
- Stock is returned and the refund is recorded.

Exporting Sales Data

- Tap Export CSV to download the filtered order list as a spreadsheet for your records or accountant.

5. Cash Management

Navigate to **Cash** in the sidebar.

Opening a Session

1. Enter your PIN.
2. Select the branch (if multi-location).
3. Enter the opening cash float.
4. Tap Open Shift.

During the Day

- Cash Drop / Banking Run: Tap Payout !' enter the amount being removed from the drawer and the reason.
- Live totals for cash sales, card sales, and split payments are shown on-screen.

Closing the Day

1. Tap Close Session.
2. Count the cash in the drawer and enter the total.
3. Review the variance — balanced means your cash matches expected; short/over flags a discrepancy.
4. Tap Confirm Close.
5. Tap Email Report to send the end-of-day summary to yourself.

Session History

Previous sessions are listed with all totals, payouts, and variance figures. Expand any session for a full breakdown.

6. Customers & Loyalty

Navigate to **Customers** in the sidebar.

Adding a Customer

Tap **New Customer** and enter:

- Name (required)
- Email — for emailed receipts and marketing
- Phone — for WhatsApp receipts

Customer Profile

Each customer record shows:

- Total lifetime spend
- Order count
- Loyalty points balance
- Outstanding credit balance
- Full order history

Loyalty Programme

- Points are earned on every sale (default: 1 point per \$10 spent).
- Points can be redeemed at the POS as a discount.
- The current balance appears on every printed receipt.
- Adjust the earn rate in Settings if needed.

Credit / Outstanding Balance

If a customer sometimes pays on account, their outstanding balance is tracked in Accounts Receivable (Section 9). The balance is shown at checkout so staff can remind the customer.

7. Staff & Roles

Navigate to **Staff** in the sidebar.

Adding a Team Member

1. Tap New Staff.
2. Enter: Name, PIN (4–6 digits), Role, Active toggle.

Built-In Roles

Role	What They Can Do
Admin	Full access — settings, reports, voids, refunds, inventory
Manager	POS + orders + inventory + cash management; can void/refund
Cashier	POS sales and orders only; voids require a manager PIN
Inventory Clerk	Inventory and stock management only; no POS access

Custom Roles

Go to **Settings !' Roles** to create a custom role with exactly the permissions you want (e.g. a role that can discount up to 20% without a PIN, or a role with reports-only access).

Manager PIN Override

If a cashier needs to issue a void, refund, or large discount, the system will prompt for a manager PIN — you do not need to log out.

Multi-Branch Staff

Click the **pin icon** on a staff member to assign them to one or more locations and mark their primary branch.

8. Inventory & Stock Control

Stock Tracking

Every product with **Track Stock** enabled will have its count decremented automatically when sold and incremented when stock is received.

Adjusting Stock Manually

1. Open the product !' Stock tab.
2. Enter the adjustment quantity:
 - Positive number (+) = stock received / correction upward
 - Negative number (") = damaged, lost, or correction downward
3. Select a reason (received, adjustment, damaged, other).
4. Save — the change is logged with timestamp and staff name.

Stock History

Every movement (sale, receive, adjustment) is logged. Open a product !**Stock** tab !' view the full history with dates and reasons.

Low Stock Alerts

- Set a minimum threshold in Settings (e.g. 3 units).
- When any product drops below this level, an automated email is sent.
- Set the alert email and preferred time in Settings !' Low Stock Alerts.

Allowing Overselling

If you want to accept orders even when stock shows zero (e.g. items on back-order), toggle **Allow Overselling** in Settings. By default this is off.

Receiving New Stock (Purchase Bills)

When a new shipment arrives from a supplier:

1. Go to Inventory !' Purchases !' New Bill.
2. Select the supplier (vendor).
3. Add each item and quantity received.
4. Tap Confirm Bill — stock is added and an Accounts Payable entry is created.

Vendors / Suppliers

Go to **Inventory !' Vendors** to manage your list of clothing suppliers: name, contact, address, and notes.

9. Accounts Receivable (AR)

Navigate to **AR** in the sidebar.

Use this when customers buy on credit (e.g. you have loyal customers who pay at end of month).

- Each credit sale creates an AR record showing: customer name, order number, amount, amount paid, status, and due date.
- Click any record to view payment history.
- Record a payment: open the record !' Record Payment !' enter amount, method, and date.
- Partial payments are supported — status moves from Open !' Partial !' Paid automatically.

10. Accounts Payable (AP)

Navigate to **AP** in the sidebar.

This tracks what you owe your clothing suppliers.

- AP entries are created automatically from confirmed Purchase Bills.
- You can also add manual entries for expenses (rent, utilities, bags, hangers).
- Record a payment: open an entry !' Record Payment.
- Aging Report: see which bills are overdue — broken into: Current, 1–30 days, 31–60 days, 61–90 days, 90+ days overdue.
- Supplier Ledger: select any vendor to see their full history of bills and payments.

11. Reports

Navigate to **Reports** in the sidebar.

Date Range

Choose a preset or enter custom dates:

- Today / Yesterday / Last 7 Days / Last 30 Days / Custom

Key Reports for a Boutique

Report	What It Tells You
Sales Summary	Total revenue, number of transactions, average sale value, tax collected
Top Products	Your best-selling items by units and revenue — know what to reorder
Sales by Category	Revenue per clothing category (Dresses vs Tops vs Accessories)
Payment Methods	How much came in via cash vs card
Hourly Sales	What time of day is busiest — useful for scheduling staff
Staff Performance	Revenue per cashier
Discounts Report	Total value discounted and by whom
Refunds & Voids	Cancellations summary
Low Stock	Products approaching your minimum threshold

Exporting

Every report section has an **Export CSV** button. Use these to share data with your accountant or analyse in Excel / Google Sheets.

12. Settings

Navigate to **Settings** in the sidebar (Admin only).

Business Profile

Setting	Description
Store Name	Appears on receipts and email headers
Address	Printed on receipts
Phone	Printed on receipts
Logo	Upload your store logo — shown on receipts and the login screen

Tax

Setting	Description
Tax Rate	Enter your GCT rate (e.g. 15%)
Tax Mode	Exclusive — tax is added on top of prices. Inclusive — tax is built into the price.

Currency

Setting	Description
Base Currency	JMD (Jamaican Dollar) — default
Secondary Currency	Optional, e.g. USD for tourists
Exchange Rate	Rate for converting to secondary currency

Receipts

Setting	Options
Paper Size	58 mm (narrow) or 80 mm (standard)
Template	Classic, Modern, Minimal, Bold — all show Amount Tendered and Change for cash sales
Footer Text	Custom message, e.g. "Thank you for shopping with us! No exchanges after 7 days."

Email Notifications

- Daily Digest: Receive a sales summary email every morning.
- Low Stock Alert: Automatic email when items fall below your set threshold.
- Choose between the built-in NEXXUS mailer or your own SMTP server.

Payment Methods

Enable or disable which payment options appear at the POS checkout.

Roles & Permissions

Create custom roles with fine-grained control over what each staff level can do.

13. Hardware

Navigate to **Hardware** in the sidebar.

Register and document every device in your store. This is especially useful when setting up a new branch or replacing equipment.

Device Types Supported

Device	Use
Receipt Printer	Print customer receipts (58 mm or 80 mm roll)
Barcode Scanner	Scan garment tags at the POS
Cash Drawer	Tracks opening float
Card Reader	Tap/chip/swipe card terminal
Customer Display	Facing screen showing cart total to the customer
Label Printer	Print price/barcode tags for garments
Tablet / PC	The device running NEXXUS POS

Adding a Device

1. Tap Add Device.
2. Select the type, enter a name (e.g. "Main Counter Scanner"), model, and serial number.
3. Add any setup notes.
4. Save.

Driver Links

Attach download links for printer or scanner drivers. Tag by platform (Windows / macOS / Android) so staff or technicians can find the right installer quickly.

14. Receipts

Templates

Choose from four templates in Settings — all are suitable for retail:

Template	Style
Classic	Clean two-column layout — professional and familiar
Modern	Logo-prominent, branded look
Minimal	Compact — fastest to print, no decoration
Bold	High-contrast — easy to read in bright natural light

Cash Payment Lines

Every cash receipt always prints:

- Amount Tendered — what the customer handed over
- Change Due — the amount returned to them

What Prints on Every Receipt

- Store name, address, phone, logo
- Order number, date, time, cashier name
- Itemised list with sizes/colours, quantity, and price
- Subtotal, GCT, any discount applied, and total
- Payment method
- Loyalty points earned this visit and running balance
- Customer name (if a customer was attached)
- Your custom footer message (e.g. exchange policy reminder)

Sharing Receipts

- Print — opens the browser print dialog; connects to your receipt printer.
- WhatsApp — sends a formatted text receipt to the customer's phone.
- Email — sends to the customer's registered email.

15. Locations (Multi-Branch)

Navigate to **Locations** in the sidebar (Admin only).

If you operate more than one boutique branch:

Adding a Branch

1. Tap New Location !' enter name, address, phone !' Save.

Per-Branch Inventory

Each location has its own stock count. Products can have different quantities at each branch.

Stock Transfers Between Branches

1. Go to Locations !' Transfer Stock.
2. Select source branch, destination branch, product, and quantity.
3. Confirm — both branches update immediately.

Staff Assignment

Assign staff to specific branches from the Staff page. Staff can be assigned to multiple locations with one marked as primary.

16. Audit Log

Navigate to **Audit** in the sidebar (Admin only).

The audit log records every significant action:

Event	Description
Sale	Every completed transaction
Void	Orders cancelled after completion
Refund	Money returned to customers
Cash Open	When a shift was opened and by whom
Cash Close	When a shift was closed, by whom, and the count
Cash Payout	Cash removed from the drawer
Product Created / Updated / Deleted	Inventory changes
Staff Created / Updated / Deleted	Team changes

Filter by action type or search by staff name. Each entry includes a timestamp and the full detail of what changed. The audit log cannot be modified or deleted.

17. Subscription & Billing

Navigate to **Subscription** in the sidebar.

Plans

Choose monthly or annual billing. Annual plans offer a discount.

Payment Options

Method	Notes
PayPal	Instant activation
Credit / Debit Card	Processed securely with 3-D Secure (Visa / Mastercard)
Bank Transfer	Upload proof of transfer; activates after review

Trial

Your account starts on a free trial with full access. When the trial ends, subscribe to continue using all features.

Quick Reference — Common Tasks

Task	Where
Add a new clothing item	Inventory !' New Product
Add sizes and colours	Inventory !' open product !' Variants tab
Receive new stock from supplier	Inventory !' Purchases !' New Bill
Process a sale	POS
Apply a store-wide discount	POS !' Discount button
Void or refund an order	Orders !' expand row !' Void / Refund
Open the cash drawer	Cash !' Open Shift
Close the day and count cash	Cash !' Close Session
Add a new customer	Customers !' New Customer (or at POS checkout)
Check today's revenue	Dashboard or Reports !' Today
See best-selling styles	Reports !' Top Products
Transfer stock between branches	Locations !' Transfer Stock
Add a staff member	Staff !' New Staff
Change the receipt footer	Settings !' Receipts !' Footer Text
Set up a low stock alert	Settings !' Low Stock Alerts
