Good morning Mr. Jones,

Thank you for the update, we have confirmed that all but one (1) of the listed issues have been resolved. Additionally, we have discovered a few other problems.

Please assist with the following:

1. Error Closing Tables

This issue stems from the previous email, where it was stated that the message "Bill printing locked" was being displayed when trying to close table orders. In addition to that, it was

discovered that when it displays that the bill is locked, and the manager opens the bill using his code, it allows us to attempt to adjust or cancel the order, but in attempting to cancel the order, it says it is not working as the bill is still locked, despite the prompt saying the table order is now open.

2. Option to Send Items to Kitchen

For dine in orders, the items in the POS system are able to use the send items to kitchen option. However, for miscellaneous items that are not included in the POS system, it says it can not send items to the kitchen. Additionally, for take out and delivery order options, the option to send items to the kitchen is not available. Currently, this option is used to save bills to each table order as there is no option to do so otherwise.

3. Payment for Pay Later Order Option

When billing an order with the pay later option, it saves the order to the POS system, and when it is time to cash out the bill for payment, it displays the message "Charge Failed", hence the order can not be closed out for payment.

Additionally, please be advised that moving forward, all matters need to be communicated with Mr. Shivnani in person, before you or your team leaves the premises, or the related matters would be considered **unresolved**.

Regards,
Swahili Beckford

The information contained in this transmission may be private and confidential. It is intended only for the use of the individual or entity named above. If you are not the intended recipient, you are hereby notified that any dissemination, distribution or copying of this communication is strictly prohibited. If you have received this communication in error, please notify us immediately by e-mail or by telephone at (876) 973-8204 and delete the original message.

Good morning Mr. Beckford,

We wish to advise that all issues identified were fixed during our visit to Lotus Restaurant today, and were tested in the presence of the restaurant manager to confirm they are working as expected.

Should any further issues arise, please outline them clearly in writing via email or a support ticket, and our team will attend to them accordingly. As a reminder, support tickets can be created directly within the POS system, in the Support section located at the top right of the screen.

We also wish to note that we have experienced a communication/language barrier with the restaurant manager and other persons on site at Lotus Restaurant. Given this, we would prefer that any future issues be communicated to us in writing, either via email or a support ticket, to ensure that nothing is lost or misunderstood in translation. Verbal communication on site would only be relied upon where the person we are communicating with has a good command of English, to avoid any miscommunication regarding the issues being reported or the steps required to resolve them.

Please note that a response to your email dated July 3, 2026 will be drafted and sent under separate cover.

Please do not hesitate to reach out should you have any questions.

Kind regards,

Elroy Jones

Good morning Mr. Jones,

We would like you and your team to assist us with the following issues:

1. POS System Glitch

There are times when the system freezes, where the touch screen does not work, and this prevents us from doing any billing. Additionally, since we sometimes cannot print the bills/receipts, we have to ask the customers to physically come to the machine and look at the screen to see their total, which is very embarrassing for Lotus, and needs an immediate fix today.

2. Bill Printing

The issue persists where the bill/receipt still has extra space when printing, which is wasting our paper rolls. Additionally, the previously identified issues as per our last email are still in effect, and have not been resolved by the stated date, July 6, 2026, in your reply email.

3. Error Closing Tables

Further to the above, it has been discovered that we have issues closing out our table orders, where it displays the message "Bill printing locked" on the POS system.

4. Previous Troubleshooting

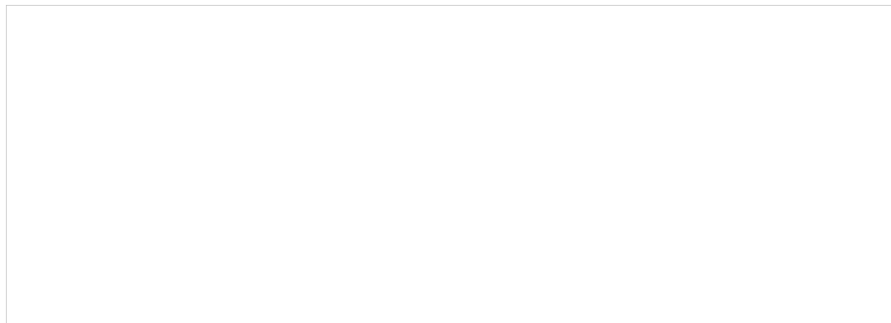

Please provide us with an update related to all previously mentioned POS issues. Additionally, we are still awaiting a response to our email sent on July 3, 2026, along with confirmed deadline dates for all pending works.

We would appreciate your assistance in resolving these issues **today, 6/7/26**, as they continue to affect our business. Please be reminded that all works, including the above mentioned, are to be completed during our normal operations hours of 8am to 8pm, as per our email dated 30/6/2026.

Regards,
Swahili Beckford (Mr.)

Good evening Ms. Beckford,

Thank you for the detailed breakdown of the issues being experienced at Lotus Restaurant. Please see our response to each item below.

1. TABLE ORDERS — ADDING ITEMS WITHOUT PRINTING

We confirm this is being worked on by our team to allow additional items to be added to an open table order without requiring the original bill to be printed first. This will be ready by July 6, 2026.

2. RECEIPT PRINTING (TABLE ORDER)

We confirm the following items are being worked on by our team and will be ready by July 6, 2026:

- a. Excess spacing on the receipt, which is wasting paper.
- b. Addition of the Lotus logo to the receipt. Kindly provide the Lotus logo in JPG or PNG format, ideally set against a light background, as this will produce the best print results on the receipt.
- c. Formatting of "Lotus Indian Cuisine" onto two lines (Lotus on one line, Indian Cuisine below), to apply to normal receipts as well.
- d. Display of both Jamaican and USD amounts on the receipt.
- e. Correction of the unit price showing as \$0.00 on printed receipts (e.g. 1 x \$0.00), despite displaying correctly on the POS system.
- f. Alignment of the table order receipt format with the normal receipt format.

3. OPERATIONAL ISSUES — INTERMITTENT PRINT FAILURES

We have identified the cause of this issue as being the same underlying issue affecting other locations, related to a recent update to the Microsoft Edge browser currently being used to run the POS system. We will be switching the

POS to run on Google Chrome instead, which does not have this issue, and this will be ready by July 6, 2026.

KITCHEN RECEIPT PRINTER — QUOTATION

Regarding your request for a printer to send orders directly to the kitchen, please find below our quotation for a wired (Ethernet) receipt printer, which we recommend for reliability in a kitchen environment over a wireless connection.

Item: Epson Thermal Receipt Printer (Ethernet/Wired)

Includes: Supply, installation, and setup/configuration to send orders directly to the kitchen

Please note that there is currently no wiring provision in place for a wired printer, as this was not identified as a requirement prior to now. As a result, the wiring for this printer would need to be surface mounted in order to run the necessary cable to the kitchen.

Total (Including Installation and GCT): JMD \$95,000.00

We recommend the wired (Ethernet) option over wireless, as a wired connection provides a more stable and reliable connection in a kitchen environment, where interference from other wireless devices and equipment can affect wireless printer reliability.

Please advise if you would like to proceed with the kitchen printer, and we will arrange procurement and installation accordingly.

We appreciate your patience as our team finalises these items, and will confirm completion via email.

Good evening Mr. Jones,

We would like you and your team to assist us with the following issues:

1. Table Orders

If the table has chosen their meal, and the table would like to add an additional drink to their order, we can not hold the bill to add the additional item. We have to print the receipt for the original order first, and then we have to print another receipt for the additional item. We would like to be able to add additional items to the receipt without having to bill out and print the receipt.

2. Receipt Printing (Table Order)

- a. The receipt is printed with extra spacing, which is wasting the roll.
- b. Additionally, the receipt does not have the Lotus' logo on it.

- c. The print out on the receipt is "Lotus Indian Cuisine" in one (1) line. It should be Lotus in one line, and Indian Cuisine below in another line. This should also apply to normal receipts.
- d. The receipt does not show the Jamaican amount, only USD. We would like it to show both.
- e. With regards to normal receipt printing, you will have the item description and the price in one (1) line, but below it, you see the quantity times unit price, but the unit price is \$0.00 (Eg. 1 x \$0.00). The unit price shows on the POS system but it does not come out on the receipt.
- f. The format for table order receipts should be the same as the normal receipts format.

3. Operational Issues

The POS does not print receipts sometimes, and this causes us to hand write bills, which does not look good, and is not professional.

Additionally, we would like to know the cost for a receipt printer for the kitchen, to be able to directly send orders to the kitchen. Please include the procuring, installation and set up for said printer in the cost, as well as if it would be a wired or wireless printer.

We would appreciate your assistance in this matter **ASAP**. Please confirm the completion of this matter via email.

Kind regards,
Swahili Beckford
