Good afternoon Mr. Jones,

Thank you for your email regarding the Lotus Restaurant updates. It is confirmed that all issues have been resolved. However, we have discovered additional issues. Please see the following:

Lotus Restaurant

After entering an order, and it goes to the Unpaid Orders section, we are unable to cancel the order. In attempting to do so, it closes out the Unpaid Orders window. Instead, we have to confirm payment for the order, move over to the Order List tab and void the payment using the Manager's code. Please see the

[attached video](#). Though it seems the cancel option is for the pop up window, we should be able to cancel the order nonetheless. Please advise if there's a proper way to resolve this.

POS Data Entry

In adding items to the system, for them to reflect on the POS Machines in the supercenter, the data entry personnel has to close out of the system upstairs, for the changes to reflect downstairs (re item price, price changes and quantity).

Cashier POS System

- 1.** Further to the POS Data Entry, the cashier has to restart their POS also to see the changes reflected.
- 2.** Relating to the total sales for the cashiers' shift, there is an issue where the system displays a shortage of a certain amount. In reality, there is no shortage, as is confirmed by the physical shift closing task and verified by the manager. Please see the [attached image](#).
- 3.** The POS for the Customer Service counter has not been set up or installed, no wiring works or anything of sort relating to said setup or installation. We would very much like for the POS to be at the counter.
- 4.** According to Mr. Martin, Mr. Weeks had done some troubleshooting for cashier station #2, however, it was not confirmed whether the troubleshooting was finished or not, hence that cashier station has not been in use since.

5. Additionally, we would like to request an additional notification sound for the POS item scan, where items that have failed to scan makes this sound. Currently, the sound is the same for items scanned vs items not scanned. Please advise if this is possible.

**Kind regards,
Swahili Beckford**
